

CMS[®]
RENTAL

Ensuring operational continuity by
eliminating critical unplanned downtime

www.cmservices.cl

Mobile and stationary equipment — torque and lifting solutions.

CMS Rental offers a comprehensive fleet of equipment, tooling, and industrial solutions designed to maximize productivity, operational continuity, and on-site support. Our extensive asset inventory is available for rapid deployment, because we understand that mining and industrial operations run around the clock and cannot afford to stop.

› Mammut M200-90 Hydraulic Jack

200-ton lifting capacity. Functions as both a hydraulic jack and a rigid support stand for heavy mining and earthmoving equipment.

› Hydraulic Torque Wrench

Delivers extremely high and precise torque output for tightening and loosening large-diameter bolts and nuts in demanding applications.

› Controlled Torque Tools

Cordless, pneumatic, electronic, and electric controlled-torque wrenches for precision fastening across all site conditions.

› Stationary Equipment

Engine-driven welders, compressors, autonomous generators, lighting towers, and high-pressure washers, among other mining and industrial support units.
